TOXICOLOGY

SUBJECT INDEX

Volume 73 (1992)

adverse effect, diphtheria-tetanus-pertussis-poliomyelitis vaccination, skin reaction, aluminium, rabbit, 117
aluminium, diphtheria-tetanus-pertussis-poliomyelitis vaccination, skin reaction, adverse effect, rabbit, 117
alveolar macrophages, methyl linoleate-9,10-ozonide, cumene hydroperoxide, lipid peroxidation, glutathione, 23
animals, ciclosporin, tumor, man, immunosuppression, nephrotoxicity, 1
aorta, semicarbazide-sensitive amine oxidase, methylamine, formaldehyde, semicarbazide, pargyline, 251
apoptosis, fluoranthene, immunotoxicity, lymphopoiesis, bone marrow, 203
Azospirillum brasilense, 2,4-dichlorophenoxyacetic acid, polyamines, protein synthesis, 71

blood pressure, catecholamines, carbon monoxide, glucose, hematocrit, hypotension, hypothermia, lactate, neurologic index, survival, 169
bolesatine, toxic protein, mushroom, *Boletus satanas*, inhibition of protein synthesis, eukaryotic ribosomes, momordin, 297
Boletus satanas, bolesatine, toxic protein, mushroom, inhibition of protein synthesis, eukaryotic ribosomes, momordin, 297
bone marrow, fluoranthene, immunotoxicity, lymphopoiesis, apoptosis, 203
bone resorption, cadmium, osteoclast, prostaglandin E_2, cAMP, calcium ion, 93
bronchoalveolar lavage, dusts, toxicity, lung, 161

cadmium, bone resorption, osteoclast, prostaglandin E_2, cAMP, calcium ion, 93
calcium ion, cadmium, bone resorption, osteoclast, prostaglandin E_2, cAMP, 93
cAMP, cadmium, bone resorption, osteoclast, prostaglandin E_2, calcium ion, 93
carbon monoxide, blood pressure, catecholamines, glucose, hematocrit, hypotension, hypothermia, lactate, neurologic index, survival, 169
catecholamines, blood pressure, carbon monoxide, glucose, hematocrit, hypotension, hypothermia, lactate, neurologic index, survival, 169
centrilobular, chloroform, toxicity, periportal, glutahione, histopathology, 239
cGMP, neutrophils, chemotaxis, chemokinesis, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 45
chelate therapy, EDTA toxicity, essential element depletion, dog, 229
chemokinesis, neutrophils, chemotaxis, cGMP, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 45
chemotaxis, neutrophils, chemokinesis, cGMP, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 45
chloroform, toxicity, centrilobular, periportal, glutahione, histopathology, 239
chlorpyrifos organophosphate, developmental, cholinesterase inhibition, parathion, methyl parathion, 35
cholestasis, F-actin, isolated rat hepatocyte couplets, 269
cholinesterase inhibition, organophosphate, developmental, parathion, methyl parathion, chlorpyrifos, 35
ciclosporin, tumor, animals, man, immunosuppression, nephrotoxicity, 1
cultured hepatocytes, flavonoids, diosmin, diosmetin, hepatotoxicity, glutathione, 179
cumene hydroperoxide, methyl linoleate-9,10-ozonide, alveolar macrophages, lipid peroxidation, glutathione, 23
cyclophosphamide, immunosuppression, species comparison, rats, mice, host resistance, *Trichinella spiralis*, 305
cytochrome *P*-450, glutathione, F-344 rat, lung, isolated cells, β-naphthoflavone, 147

developmental, organophosphate, cholinesterase inhibition, parathion, methyl parathion, chlorpyrifos, 35
2,4-dichlorophenoxyacetic acid, polyamines, *Azospirillum brasilense*, protein synthesis, 71
di-*n*-butyltin dichloride, organotin, teratogenicity, fetal malformation, susceptible period, rat, 81

diosmetin, flavonoids, diosmin, cultured hepatocytes, hepatotoxicity, glutathione, 179
diosmin, flavonoids, diosmetin, cultured hepatocytes, hepatotoxicity, glutathione, 179
diphtheria-tetanus-pertussis-poliomyelitis vaccination, skin reaction, aluminium, adverse effect, rabbit, 117
dog, EDTA toxicity, essential element depletion, chelate therapy, 229
dusts, bronchoalveolar lavage, toxicity, lung, 161

EDTA toxicity, essential element depletion, chelate therapy, dog, 229
electron spin resonance, 1,1,2,2-tetrachloroethane, hepatotoxicity, monooxygenases, lipid peroxidation, 101
endothelial cells, endothelium, heavy metals, lead, plasminogen activators, vascular, 219
endothelium, endothelial cells, heavy metals, lead, plasminogen activators, vascular, 219
essential element depletion, EDTA toxicity, chelate therapy, dog, 229
eukaryotic ribosomes, bolesatine, toxic protein, mushroom, *Boletus satanas*, inhibition of protein synthesis, momordin, 297

F-344 rat, cytochrome *P*-450, glutathione, lung, isolated cells, β-naphthoflavone, 147
F-actin, cholestasis, isolated rat hepatocyte couplets, 269
fetal malformation, di-*n*-butyltin dichloride, organotin, teratogenicity, susceptible period, rat, 81
flavonoids, diosmin, diosmetin, cultured hepatocytes, hepatotoxicity, glutathione, 179
fluoranthene, immunotoxicity, lymphopoiesis, apoptosis, bone marrow, 203
formaldehyde, semicarbazide-sensitive amine oxidase, methylamine, aorta, semicarbazide, pargyline, 251

glucose, blood pressure, catecholamines, carbon monoxide, hematocrit, hypotension, hypothermia, lactate, neurologic index, survival, 169
glutahione, chloroform, toxicity, centrilobular, periportal, histopathology, 239
glutathione, cytochrome *P*-450, F-344 rat, lung, isolated cells, β-naphthoflavone, 147
glutathione flavonoids, diosmin, diosmetin, cultured hepatocytes, hepatotoxicity, 179
glutathione methyl linoleate-9,10-ozonide, cumene hydroperoxide, alveolar macrophages, lipid peroxidation, 23
glutathione-*S*-transferase halothane, liver slices, hypersensitivity, protein adducts, 281
gout, nephrotoxicity, lead toxicity, lead-binding proteins, metallothionein, inclusion bodies, hypertension, 127

halothane, liver slices, hypersensitivity, protein adducts, glutathione-*S*-transferase, 281
heavy metals, endothelium, endothelial cells, lead, plasminogen activators, vascular, 219
hematocrit, blood pressure, catecholamines, carbon monoxide, glucose, hypotension, hypothermia, lactate, neurologic index, survival, 169
hepatotoxicity, flavonoids, diosmin, diosmetin, cultured hepatocytes, glutathione, 179
hepatotoxicity, *Karwinskia humboldtiana* toxins, primary cultured rat hepatocytes, 191
hepatotoxicity, *Karwinskia humboldtiana* toxins, primary cultured rat hepatocytes, 259
hepatotoxicity, 1,1,2,2-tetrachloroethane, monooxygenases, electron spin resonance, lipid peroxidation, 101
histopathology, chloroform, toxicity, centrilobular, periportal, glutahione, 239
host resistance, cyclophosphamide, immunosuppression, species comparison, rats, mice, *Trichinella spiralis*, 305
hypersensitivity, halothane, liver slices, protein adducts, glutathione-*S*-transferase, 281
hypertension, nephrotoxicity, lead toxicity, lead-binding proteins, metallothionein, inclusion bodies, gout, 127
hypotension, blood pressure, catecholamines, carbon monoxide, glucose, hematocrit, hypothermia, lactate, neurologic index, survival, 169
hypothermia, blood pressure, catecholamines, carbon monoxide, glucose, hematocrit, hypotension, lactate, neurologic index, survival, 169

immunosuppression, ciclosporin, tumor, animals, man, nephrotoxicity, 1
immunosuppression, cyclophosphamide, species comparison, rats, mice, host resistance, *Trichinella spiralis*, 305
immunotoxicity, fluoranthene, lymphopoiesis, apoptosis, bone marrow, 203
inclusion bodies, nephrotoxicity, lead toxicity, lead-binding proteins, metallothionein, hypertension, gout, 127
inhibition of protein synthesis, bolesatine, toxic protein, mushroom, *Boletus satanas*, eukaryotic ribosomes, momordin, 297
isolated cells, cytochrome *P*-450, glutathione, F-344 rat, lung, β-naphthoflavone, 147
isolated rat hepatocyte couplets, cholestasis, F-actin, 269

Karwinskia humboldtiana toxins, hepatotoxicity, primary cultured rat hepatocytes, 191
Karwinskia humboldtiana toxins, hepatotoxicity, primary cultured rat hepatocytes, 259

lactate, blood pressure, catecholamines, carbon monoxide, glucose, hematocrit, hypotension, hypothermia, neurologic index, survival, 169
lead, endothelium, endothelial cells, heavy metals, plasminogen activators, vascular, 219
lead toxicity, nephrotoxicity, lead-binding proteins, metallothionein, inclusion bodies, hypertension, gout, 127
lead-binding proteins, nephrotoxicity, lead toxicity, metallothionein, inclusion bodies, hypertension, gout, 127
lipid peroxidation,1,1,2,2-tetrachloroethane, hepatotoxicity, monooxygenases, electron spin resonance, 101
lipid peroxidation, methyl linoleate-9,10-ozonide, cumene hydroperoxide, alveolar macrophages, glutathione, 23
liver slices, halothane, hypersensitivity, protein adducts, glutathione-*S*-transferase, 281
lung, cytochrome *P*-450, glutathione, F-344 rat, isolated cells, β-naphthoflavone, 147
lung, bronchoalveolar lavage, dusts, toxicity, 161
lymphopoiesis, fluoranthene, immunotoxicity, apoptosis, bone marrow, 203

man, ciclosporin, tumor, animals, immunosuppression, nephrotoxicity, 1
metallothionein, nephrotoxicity, lead toxicity, lead-binding proteins, inclusion bodies, hypertension, gout, 127
methyl linoleate-9,10-ozonide, cumene hydroperoxide, alveolar macrophages, lipid peroxidation, glutathione, 23
methyl parathion, organophosphate, developmental, cholinesterase inhibition, parathion, chlorpyrifos, 35
methylamine, semicarbazide-sensitive amine oxidase, formaldehyde, aorta, semicarbazide, pargyline, 251
mice, cyclophosphamide, immunosuppression, species comparison, rats, host resistance, *Trichinella spiralis*, 305
momordin, bolesatine, toxic protein, mushroom, *Boletus satanas*, inhibition of protein synthesis, eukaryotic ribosomes, 297
monooxygenases, 1,1,2,2-tetrachloroethane, hepatotoxicity, electron spin resonance, lipid peroxidation, 101
mushroom, bolesatine, toxic protein, *Boletus satanas*, inhibition of protein synthesis, eukaryotic ribosomes, momordin, 297

N-methyl-*N'*-nitro-*N*-nitrosoguanidine, neutrophils, chemotaxis, chemokinesis, cGMP, 45
β-naphthoflavone, cytochrome *P*-450, glutathione, F-344 rat, lung, isolated cells, 147
nephrotoxicity, lead toxicity, lead-binding proteins, metallothionein, inclusion bodies, hypertension, gout, 127
nephrotoxicity, ciclosporin, tumor, animals, man, immunosuppression, 1
neurologic index, blood pressure, catecholamines, carbon monoxide, glucose, hematocrit, hypotension, hypothermia, lactate, survival, 169
neutrophils, chemotaxis, chemokinesis, cGMP, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 45

oral toxicity, single administration, rat, 2,3,7,8-tetrabromodibenzo-*p*-dioxin, 53
organophosphate, developmental, cholinesterase inhibition, parathion, methyl parathion, chlorpyrifos, 35
organotin, di-*n*-butyltin dichloride, teratogenicity, fetal malformation, susceptible period, rat, 81
osteoclast, cadmium, bone resorption, prostaglandin E_2, cAMP, calcium ion, 93

parathion, organophosphate, developmental, cholinesterase inhibition, methyl parathion, chlorpyrifos, 35
pargyline, semicarbazide-sensitive amine oxidase, methylamine, formaldehyde, aorta, semicarbazide, 251
periportal, chloroform, toxicity, centrilobular, glutahione, histopathology, 239
plasminogen activators, endothelium, endothelial cells, heavy metals, lead, vascular, 219
polyamines, 2,4-dichlorophenoxyacetic acid, *Azospirillum brasilense*, protein synthesis, 71
primary cultured rat hepatocytes, hepatotoxicity, *Karwinskia humboldtiana* toxins, 191
primary cultured rat hepatocytes, hepatotoxicity, *Karwinskia humboldtiana* toxins, 259
prostaglandin E_2, cadmium, bone resorption, osteoclast, cAMP, calcium ion, 93
protein adducts, halothane, liver slices, hypersensitivity, glutathione-*S*-transferase, 281
protein synthesis, 2,4-dichlorophenoxyacetic acid, polyamines, *Azospirillum brasilense*, 71

rabbit diphtheria-tetanus-pertussis-poliomyelitis vaccination, skin reaction, aluminium, adverse effect, 117
rat, oral toxicity, single administration, 2,3,7,8-tetrabromodibenzo-*p*-dioxin, 53
rat, di-*n*-butyltin dichloride, organotin, terato-

genicity, fetal malformation, susceptible period, 81
rats, cyclophosphamide, immunosuppression, species comparison, mice, host resistance, *Trichinella spiralis*, 305

semicarbazide, semicarbazide-sensitive amine oxidase, methylamine, formaldehyde, aorta, pargyline, 251
semicarbazide-sensitive amine oxidase, methylamine, formaldehyde, aorta, semicarbazide, pargyline, 251
single administration, oral toxicity, rat, 2,3,7,8-tetrabromodibenzo-*p*-dioxin, 53
skin reaction, diphtheria-tetanus-pertussis-poliomyelitis vaccination, aluminium, adverse effect, rabbit, 117
species comparison, cyclophosphamide, immunosuppression, rats, mice, host resistance, *Trichinella spiralis*, 305
survival, blood pressure, catecholamines, carbon monoxide, glucose, hematocrit, hypotension, hypothermia, lactate, neurologic index, 169
susceptible period, di-*n*-butyltin dichloride, organotin, teratogenicity, fetal malformation, rat, 81

teratogenicity, di-*n*-butyltin dichloride, organotin, fetal malformation, susceptible period, rat, 81
2,3,7,8-tetrabromodibenzo-*p*-dioxin oral toxicity, single administration, rat, 53
1,1,2,2-tetrachloroethane, hepatotoxicity, monooxygenases, electron spin resonance, lipid peroxidation, 101
toxic protein, bolesatine, mushroom, *Boletus satanas*, inhibition of protein synthesis, eukaryotic ribosomes, momordin, 297
toxicity, bronchoalveolar lavage, dusts, lung, 161
toxicity, chloroform, centrilobular, periportal, glutahione, histopathology, 239
Trichinella spiralis, cyclophosphamide, immunosuppression, species comparison, rats, mice, host resistance, 305
tumor, ciclosporin, animals, man, immunosuppression, nephrotoxicity, 1

vascular, endothelium, endothelial cells, heavy metals, lead, plasminogen activators, 219
